Most banks have an online payment feature, to setup recurring monthly payments for a specified date (providing the payment amount remains the same each month). This feature can be helpful in preventing late fees and/or service interruptions due to late or missed payments.

In order to make your first payment, you will need to create a TelPay account. Simply log into TelPay's website, www.telpay.ca . From the website, select either Personal or Business, depending on which type of account you will be using. Click on **"Click here to get started with WebPay"**. Under New Customers, click on **"Get Started"**, then select one of the choices under **"This Application is for"**, then click on **"Go"**. Next click on **"Get Started"**, and complete the application form. At the bottom of the application form, you can also initiate your first payment by selecting **"Yes"**, then click on **"next"**.

When making your first payment, you will have to indicate the company you are paying **"EH!tel Networks Inc."** by using our account number **0083137**.

It takes approximately four (4) business days for payments of this nature to process and our receipt of notification for such payment(s).
